## DIGI-PAS' EXTENDS REACH WITH DIGITAL LEVEL SALES

*August 15, 2013*

Avon, CT – Digi-Pas is a leading brand of Electronic Digital Levels and provides a complete range of precision digital leveling products. Digi-Pas is the trademark of JSB Tech which has more than two decades of experience and has served leading global multinational companies.

Over the years, its products and services have been utilized across the globe. Most of its products that are designed have been geared toward professionals, specialists, tradesmen and do-it-yourself users. JSB Tech has offices located in the United States, Japan, the United Kingdom and Germany with a research and development facility and factories in Singapore as well. Digi-Pas has a highly specialized and experienced team of professionals that are focused on developing core capabilities within niche domains.

Digi-Pas is the registered trademark of Digi-Pas USA LLC and is a division of Ventura group of companies. Digi-Pas was the pioneer of the world's first Dual Axis high precision digital level with built-in vibrometer and angle-meter functions. It further pioneered the world's first dual axis digital machinist level.

All products by Digi-Pas are design-registered, patented and certified by TUV SUD, SGS to comply with CE, FCC, C-Tick, RoHS. Its product performance and specifications are verified by Calibration & Test Bodies in the U.S., Japan, UK and Germany. All of the organization's factories are ISO 9001:2000, ISO140001:2004 and OHSAS 18001:2007 certified.

The success of Digi-Pas' line of products is mainly due to its focus on research and development. The company has strategically focused on applied research and has collaborated with A\*STAR (Agency for Science, Technology and Research) to successfully develop new and improved products and to

turn research findings into market-leading products.

In September and October, Digi-Pas will be involved in the EMO Hannover in Germany and THS Taichung in Taiwan. Since last year, Digi-Pas has participated in numerous trade shows and exhibitions, such as the International Manufacturing Technology Show in Chicago, the China International Machine Tool Show in Beijing and the National Hardware Show USA in Las Vegas.

On its website, Digi-Pas also publishes online newsletters every few months or so – its latest one was published in April of this year titled “Mobile Android Apps Software.” Videos are released too in order to highlight the latest products.

Digi-Pas has attained around 30 intellectual property rights, including patents, registered designs and trademarks. Its successful R&D efforts have resulted in the launch of many world-class innovative products. In the future, the company will continue to focus on R&D and has confirmed that it is committed to providing its global customers products that are truly innovative and exciting.
